

Robert E. Williams

EDUCATION: B.S., Petroleum Geology
Oklahoma State University, December 1991

WORK EXPERIENCE:

2001 - Present

William M. Cobb & Associates, Inc.

Senior Geologist

- Import, digitize, and generate project structure and isopach maps for use in reservoir volumetric calculations or data export for reservoir simulation
- Create petrophysical projects in PETCOM PowerLog software: importing LAS (ASCII) files and data quality control
- Construct and maintain various databases of engineering and economic information for property evaluation projects and support for acquisition and divestiture projects
- Maintain corporate computer systems, including Intranet/LAN NT server, Internet website, PCs, and peripherals

1997 - 2001

Gaffney, Cline & Associates - Dallas, TX.

Geologist

- Digitized and generated prospect structure and net pay isopach maps for reservoir volumetric calculations and loaded well data into various PC/Unix databases
- Managed statistical database of project data including security and quality control checkpoints
- Involved in basin studies in Asia, Caribbean, Central American, Gulf of Mexico, North Africa, North America and South America; and well log studies in Russia
- Scheduled and maintained layout and design of Intranet/Internet sites

- Aided a national government in the deployment of a website to promote their exploration blocks (this was the first site to ever utilize the Internet as a medium to reach potential buyers for oil and gas properties)

1997

Sperry-Sun - Lafayette, LA.

Field Engineer

- Generated real-time and final logs from data pulsed to surface from downhole logging, tracked depth and performed drilling mud tests for sand content and resistivity of the mud filtrate

1994 - 1997

Glover Construction Company, Inc. - Muskogee, OK.

Project Foreman/Superintendent

- Managed construction crews, subcontractors, and safety related and environmental issues in all phases of highway construction
- Maintained relationship between Department of Transportation and the Bureau of Indian Affairs

1993 - 1994

Century Geophysical - Tulsa, OK.

Field Engineer/Assistant Manager

- Operated several downhole logging tools for environmental monitoring wells and oil and gas evaluations
- Trained field engineers on all aspects of logging and field equipment
- Managed field office

1991 - 1992

Mobil Exploration and Production - Oklahoma City, OK.

Intern Geologist

- Analyzed geological and geophysical data to develop drilling prospects in Oklahoma, Texas, Mississippi, Alabama, and European areas

- Produced and presented technical work to upper management

TECHNICAL AND PROFESSIONAL SOCIETIES:

- American Association of Petroleum Geologists
- Dallas Geological Society

REGISTRATION:

- Licensed Professional Geologist, State of Texas

05/07
